SUBJECT: Advanced Technology Support Program IV (ATSP4);
Commencement of Source Selection Activities

- 1) The purpose of this letter is to provide notice of an upcoming Source Selection for the ATSP4 requirement and to publicize the DMEA web site where additional information is available.
- 2) The ATSP4 will be the next in a highly successful series of engineering services contracts. ATSP4 is a uniform technical and management approach that leverages advanced technologies to meet the requirements of the Department of Defense (DoD) for a quick reaction capability across the entire spectrum of technology development, acquisition, and long-term support.
